

Restorative Reproductive Medicine Bibliography

This bibliography lists medical literature relevant to a general area of restorative reproductive medicine. While an attempt has been made to list important literature for pathophysiology and treatment, it is not intended to be exhaustive. References are included for pertinent scientific information, whether or not they directly support a restorative reproductive approach. The references are sorted by date (most recent date first). If you have any comments or are aware of any references that should be added, please [contact us](#).
